Foreword

This study of Employment, Payrolls, Hours and Wages in 115 Selected Code Industries was prepared by Mr. Martin Taitel of the Statistics Section, Mr. W. J. Maguire in charge. Further acknowledgements are embodied in the text.

The purpose of this report is to present as complete a summary picture as possible of the movements in employment, payrolls, hours and wages in coded industries during 1933, 1934, and 1935. The data include not only such regularly published material as is appropriate for this purpose but also the results of a survey made in cooperation with the Bureau of Labor Statistics. The term "Wages" as used in this report is equivalent to the Bureau of Labor Statistics term "Earnings".

The continuation, at least through March 1936, of tabulations covering nineteen of the major coded industries included in the report has been recommended by the Bureau of Labor Statistics. The nineteen coded industries selected represent more significant economic entities than the corresponding industries by which the reports are at present classified and tabulated.

At the back of the report will be found a brief statement of the studies undertaken by the Division of Review.

EMPLOYMENT, PAYROLLS, HOURS AND WAGES IN
115 SELECTED CODE INDUSTRIES, 1953-1955

PURPOSE OF REPORT

The material in this report is presented to give as complete a summary picture as possible of the movements in employment, payrolls, hours and wages in coded industries during 1953, 1954 and 1955. The data include not only such regularly published material as is appropriate for this purpose but also the results of a survey made in cooperation with the Bureau of Labor Statistics.

THE DATA

Limited Available Data

The project of compiling this material was started in the summer of 1954. It soon became evident that the amount of monthly data regularly collected which covered fields comparable to those covered by Code definitions was extremely limited. In the first place, only a limited amount of monthly labor statistics, classified by industries, was being collected currently by government agencies. Approximately one half of the factory employees in manufacturing industries were being covered while a considerably smaller portion of the employees in non-manufacturing industries was being covered. Practically all of this material was being col-

lected by the Bureau of Labor Statistics. In the second place, classifications of industries used by the Bureau of Labor Statistics and other Government agencies were based upon criteria considerably different from those used by industries in applying for NRA Codes. This eliminated the possibility of using a large portion of the material regularly published.

Special Survey of Manufacturing Industries (Bureau of Labor Statistics in Cooperation with NRA).

Acknowledgements - In order to obtain data whose coverage was approximately identical with industries as defined by the various Codes, a special survey of manufacturing establishments was made early in 1935. This survey was carried on by the Coded Industries Section organized for this purpose within the Bureau of Labor Statistics under the direction of Mr. Bernard Barton. Funds for the project were supplied by the National Recovery Administration, which, in addition, cooperated actively in the development of the study. Mr. F. C. Reich and Mr. F. W. Clark of the Statistics Section of NRA, besides constructing a manual for editing schedules, rendered considerable assistance in the editing itself. (For this work they became sworn employees of the Bureau of Labor Statistics, hereinafter abbreviated B.L.S.). Mr. Martin Taitel, Statistics Section of NRA, the National Recovery Administration representative for the survey, directed the final organization of the material. Miss E. L. Greenbank of the Statistics Section assisted in the preparation and presentation of the report. The Central Statistical Board cooperated in initiating the project.

The Schedule -- Establishments reporting to B.L.S. were requested to report their figures on employment, payrolls, and man-hours for December, 1934 broken down by Coded Industries. In addition, they were requested to report their employment for June and December, 1933 and 1934 by Coded Industries. These reports and careful checking of code definitions against B.L.S. classifications served as the basis for tabulating by codes the data B.L.S. collected. The schedule and the letter of transmittal are shown in Appendix III. This schedule as well as those regularly used by B.L.S. requests data for the pay period ending nearest the fifteenth of the month. Where the pay period covers more than one week, figures reported were reduced to a weekly basis.

Method of Tabulation - In tabulating the material, those B.L.S. classifications which conformed approximately to code definitions were used. It was found that 48 B.L.S. classifications, corresponding to 37 codes, (*) could be used as previously tabulated. The remaining B.L.S. classifications were tabulated for such codes as the samples seemed to warrant. In general, establishments operating under more than one code were classified according to their principal code, i.e., the code covering at least two-thirds of their employees. In some cases figures for

(*) In five cases figures for two B.L.S. classifications were combined by NRA to represent a single code; in one case (Transit Industry) a non-manufacturing classification was combined with a manufacturing classification. For the Petroleum Industry a non-manufacturing classification was used to supplement the manufacturing classification, but the two were not combined.

individual establishments were allocated to two or more coded industries.

The tabulations were based not upon a rigorous standard of purity of sample for each code, but upon an approximation to purity of sample sufficient to present a rather accurate picture of labor conditions in the coded industries. It is believed that such an approximation was achieved for the data included in this report. In every case more than 75 per cent of the employees in the sample were covered by the code definition in question; in most cases, more than 90 per cent.

Technical Methods - Indexes of employment and payrolls were constructed by NRA from all classifications that were retabulated. The method used was that of chaining together percentage changes based upon data from identical establishments, for each pair of adjacent months. This is the same method as that used by the Bureau of Labor Statistics in constructing its regularly published indexes. For industries for which no retabulation of the data was necessary the regularly published B.L.S. indexes were used. Most of these had previously been adjusted to 1933 Census totals by NRA. These are presented as adjusted. The differences between these indexes and those which would have been obtained had no adjustments to the 1933 Census figures been made are negligible so far as comparisons between 1933, 1934, and 1935 are concerned.

For the series on average hours worked per week, average hourly wages and average weekly wages, the Bureau of Labor Statistics

obtained results for identical establishments in each pair of adjacent months -- for example, June and July, 1954 and July and August, 1955. In this report only figures for the "current month" or the later of the two adjacent months are shown. Thus, figures for no two months of the period covered for a particular industry may cover exactly the same establishments, although a large part of the sample may be identical throughout the entire period. It would have been possible to construct "chain indexes" for each of the series of averages, but this was deemed to give less reliable results, because of the accumulation of sampling errors as a result of the chaining process. However, in most cases, either technique would have given substantially the same results.

In all cases where man-hour indexes are shown, they have been constructed by multiplying average hours worked per week by the index of employment. In this they differ from man-hour indexes published by B.L.S. which were constructed by multiplying "chain indexes" for average hours worked per week by "chain indexes" of employment.

Number of Codes Under Which Establishments Operated - An interesting by-product of the survey was a tabulation of establishments and employees in those establishments by the number of codes under which the establishment operated. It showed that approximately 94 per cent of the reporting establishments operated under one code and employed approximately 85 per cent of the employees reported. This indicates that the larger establishments were more likely to be subject to more than one code than were the smaller establishments.

The complete table is shown in Appendix II.

Non-Manufacturing Industries

The material on the coded non-manufacturing industries is extremely limited since regularly collected data on these industries are meager and since the special survey was confined to the manufacturing industries. Data on the eight B.L.S. classifications (*) that cover major parts of or approximately the same fields as the code definitions have been included in this report. The technical methods used have been the same as for the manufacturing industries.

Size of Samples

Appendix I gives the average size of the samples for each industry during 1933 and during 1934 as well as the minimum size during this period. Sample sizes are given in terms of establishments and employees. In 1935 the samples were approximately of the same size as in 1934. In instances where data are missing from the various tables samples for the period were either inadequate or not available.

The samples from which average hours worked per week and average hourly wages were derived have, in most cases, been smaller than those from which average weekly wages were derived. Consequently, instances will be found in which weekly wages do not equal the product of hourly wages and average hours worked per week.

(*) Two of these were used to supplement data for manufacturing classifications.

Chart Markings

In assembling the material it was originally planned to indicate on the charts important events and developments within each industry. Limitations of time and personnel have prevented the complete materialization of this plan.

Markings have been placed upon the charts indicating the date on which the President's Reemployment Agreement was initiated, the date on which the Code became effective and the date of the Schechter decision. These markings divide the period covered by the charts into three parts, pre-code, code, and post-code, thus serving as guide posts to such conclusions as may be drawn with respect to the effects of the Codes.

The PRA marking is not shown in charts for industries in which the code became effective prior to August 1, 1933. In all other cases the PRA marking has been placed at August 1, 1933. With reference to these markings it should be remembered that the provisions of the President's Reemployment Agreement became effective when signed by individual firms. A number of firms never signed the Agreement. Furthermore, substitutions for PRA provisions were obtained by various industries and these became effective for all firms who had signed the Agreement in these industries respectively. For the most part these substitutions went into effect between August 15 and September 15, 1933 although a few cases became effective as late as October, 1933.

Source: Bureau of Labor Statistics. Data are for classification "Aircraft." During June and December 1933 and 1934, approximately 98 per cent of the employees reported under the classification, were covered by the proposed code definition. For explanation of the methods used, some of which result in figures different from those of B.L.S., see text.

10	1	<u>b/</u>	2,677	0.1

Source: Bureau of Labor Statistics in cooperation with the Division of Review, NRA. Data cover payroll periods ending nearest December 15, 1934.

a/ Excludes employees not allocated by reporting firms to any approved or pending code.

b/ Less than one-tenth of one per cent.

APPENDIX III
U.S. DEPARTMENT OF LABOR
BUREAU OF LABOR STATISTICS
WASHINGTON

January 15, 1935

Gentlemen:

It has been found necessary to determine trends of employment and pay rolls, not only for each industry but also for the different N.R.A. code classifications. On the form which is transmitted with this letter you are requested to enter the names and numbers of the codes under which you are operating with the employees, pay rolls and man hours for each code. This information will be requested only at infrequent intervals, as may be found necessary in classifying employment data on both an industrial and a code basis.

If your establishment operates under more than one code, the entire form is to be filled out. If you are operating under one code only, omit inquiry number III.

It is planned to compare the figures supplied on this form with those which you have been furnishing on the regular monthly form. The last report you sent us was for December 1934. If there is a difference between the December totals previously submitted and those inserted on the enclosed form, will you kindly indicate the reason. We can understand, for example, that the basis on which factory or shop employees have been reported in the past may not quite correspond to the definition on the enclosed blank.

Your replies will be held in strict confidence and will be used for general statistical purposes only. The information furnished by any individual firm will not be available to any person other than sworn employees of the Bureau of Labor Statistics. The reports will not be used for purposes of compliance.

An envelope not requiring postage is supplied herewith for your convenience. Please fill out and return the enclosed blank as soon as possible.

Very truly yours,

Isador Lubin,
Commissioner of Labor Statistics.

U. S. DEPARTMENT OF LABOR
BUREAU OF LABOR STATISTICS
WASHINGTON

GENTLEMEN: In response to numerous requests for information concerning employment classified according to the NRA codes, the Bureau of Labor Statistics has undertaken the following inquiry. I shall be greatly obliged if you will supply the information requested and return this form to this office at the earliest date possible. This is a special request. It is not our intention to ask for this information regularly. *A separate report is needed for each establishment.*

Information relating to individual firms will be available only to sworn employees of the United States Bureau of Labor Statistics and will be used for statistical purposes only.

A franked addressed envelop is provided for your convenience. Your cooperation is greatly appreciated.

Very truly yours,

ISADOR LUBIN,

Commissioner of Labor Statistics.

INQUIRY NO. I

Name the principal products, type of products, or services of this establishment in order of importance (based on total sales value):

IN JUNE 1933

IN DECEMBER 1934

- | | |

| (5) | (5) |

INQUIRY NO. II

IF THIS ESTABLISHMENT OPERATES UNDER ONLY ONE CODE, give code name and number below and DO NOT answer Inquiry No. III on reverse side.

Name of NRA Code Code Number

[OVER]

14-3059

9853

138

INQUIRY NO. III

TO BE ANSWERED BY EACH ESTABLISHMENT THAT OPERATES UNDER MORE THAN ONE CODE

All information furnished below should relate to shop employees only

SHOP EMPLOYEES.—Include all skilled and unskilled, piece or time workers on productive processes, clerical workers in productive departments, engineers, firemen, watchmen, packers, etc.; also foremen and overseers in minor positions who perform work similar to that done by the persons under their supervision. DO NOT include persons working at their homes or in other establishments on materials furnished by establishment reported on.

PART A.—Indicate in table below code numbers and names of codes under which establishment was operating during December, 1934. Indicate also the approximate number of employees, amount of pay roll and number of man-hours allocated to each code, for the pay period ending nearest December 15, 1934.

PAY PERIOD ENDING NEAREST DEC. 15, 1934	CODE NUMBER	NAME OF CODE	NUMBER OF EMPLOYEES ¹	AMOUNT OF PAY ROLL	NUMBER OF MAN HOURS
From—					
....., 1934,					
To—					
....., 1934					
Not allocated to any code.....					
TOTAL.....					

¹ Any employee who works under more than one code should be allocated to the code under which his principal activities come.

PART B.—For each of the pay periods specified below, estimate the approximate number of employees allocated to each code. For the periods when codes were not yet in effect make the allocation of employees as if present code provisions and rules had actually been in operation.

CODE NUMBER	NAME OF CODE	NUMBER OF EMPLOYEES ¹		
		Pay period ending nearest June 15, 1933	Pay period ending nearest Dec. 15, 1933	Pay period ending nearest June 15, 1934
Not allocated to any code.....				
TOTAL.....				

¹ Any employee who works under more than one code should be allocated to the code under which his principal activities come.

OFFICE OF THE NATIONAL RECOVERY ADMINISTRATION
THE DIVISION OF REVIEW

THE WORK OF THE DIVISION OF REVIEW

Executive Order No. 7075, dated June 15, 1935, established the Division of Review of the National Recovery Administration. The pertinent part of the Executive Order reads thus:

The Division of Review shall assemble, analyze, and report upon the statistical information and records of experience of the operations of the various trades and industries heretofore subject to codes of fair competition, shall study the effects of such codes upon trade, industrial and labor conditions in general, and other related matters, shall make available for the protection and promotion of the public interest an adequate review of the effects of the Administration of Title I of the National Industrial Recovery Act, and the principles and policies put into effect thereunder, and shall otherwise aid the President in carrying out his functions under the said Title. I hereby appoint Leon C. Marshall, Director of the Division of Review.

The study sections set up in the Division of Review covered these areas: industry studies, foreign trade studies, labor studies, trade practice studies, statistical studies, legal studies, administration studies, miscellaneous studies, and the writing of code histories. The materials which were produced by these sections are indicated below.

Except for the Code Histories, all items mentioned below are scheduled to be in mimeographed form by April 1, 1936.

THE CODE HISTORIES

The Code Histories are documented accounts of the formation and administration of the codes. They contain the definition of the industry and the principal products thereof; the classes of members in the industry; the history of code formation including an account of the sponsoring organizations, the conferences, negotiations and hearings which were held, and the activities in connection with obtaining approval of the code; the history of the administration of the code, covering the organization and operation of the code authority, the difficulties encountered in administration, the extent of compliance or non-compliance, and the general success or lack of success of the code, and an analysis of the operation of code provisions dealing with wages, hours, trade practices, and other provisions. These and other matters are canvassed not only in terms of the materials to be found in the files, but also in terms of the experiences of the deputies and others concerned with code formation and administration.

The Code Histories, (including histories of certain NRA units or agencies) are not mimeographed. They are to be turned over to the Department of Commerce in typewritten form. All told, approximately eight hundred and fifty (850) histories will be completed. This number includes all of the approved codes and some of the unapproved codes. (In Work Materials No. 18, Contents of Code Histories, will be found the outline which governed the preparation of Code Histories.)

(In the case of all approved codes and also in the case of some codes not carried to final approval, there are in NRA files further materials on industries. Particularly worthy of mention are the Volumes I, II and III which constitute the material officially submitted to the President in support of the recommendation for approval of each code. These volumes 9768--1.

set forth the origination of the code, the sponsoring group, the evidence advanced to support the proposal, the report of the Division of Research and Planning on the industry, the recommendations of the various Advisory Boards, certain types of official correspondence, the transcript of the formal hearing, and other pertinent matter. There is also much official information relating to amendments, interpretations, exemptions, and other rulings. The materials mentioned in this paragraph were of course not a part of the work of the Division of Review.)

THE WORK MATERIALS SERIES

In the work of the Division of Review a considerable number of studies and compilations of data (other than those noted below in the Evidence Studies Series and the Statistical Material Series) have been made. These are listed below, grouped according to the character of the material. (In Work Materials No. 17, Tentative Outlines and Summaries of Studies in Process, these materials are fully described).

Industry Studies

Automobile Industry, An Economic Survey of
Bituminous Coal Industry under Free Competition and Code Regulation, Economic Survey of
Electrical Manufacturing Industry, The
Fertilizer Industry, The
Fishery Industry and the Fishery Codes
Fishermen and Fishing Craft, Earnings of
Foreign Trade under the National Industrial Recovery Act
Part A - Competitive Position of the United States in International Trade 1927-29 through 1934.
Part B - Section 3 (e) of NIRA and its administration.
Part C - Imports and Importing under NRA Codes.
Part D - Exports and Exporting under NRA Codes.
Forest Products Industries, Foreign Trade Study of the
Iron and Steel Industry, The
Knitting Industries, The
Leather and Shoe Industries, The
Lumber and Timber Products Industry, Economic Problems of the
Men's Clothing Industry, The
Millinery Industry, The
Motion Picture Industry, The
Migration of Industry, The. The Shift of Twenty-Five Needle Trades From New York State, 1926 to 1934
National Labor Income by Months, 1929-35
Paper Industry, The
Production, Prices, Employment and Payrolls in Industry, Agriculture and Railway Transportation, January 1923, to date
Retail Trades Study, The
Rubber Industry Study, The
Textile Industry in the United Kingdom, France, Germany, Italy, and Japan
Textile Yarns and Fabrics
Tobacco Industry, The
Wholesale Trades Study, The
Women's Neckwear and Scarf Industry, Financial and Labor Data on

Women's Apparel Industry, Some Aspects of the

Trade Practice Studies

Commodities, Information Concerning: A Study of NRA and Related Experiences in Control
Distribution, Manufacturers' Control of: Trade Practice Provisions in Selected NRA Codes
Distributive Relations in the Asbestos Industry
Design Piracy: The Problem and Its Treatment Under NRA Codes
Electrical Mfg. Industry: Price Filing Study
Fertilizer Industry: Price Filing Study
Geographical Price Relations Under Codes of Fair Competition. Control of
Minimum Price Regulation Under Codes of Fair Competition
Multiple Basing Point System in the Lime Industry: Operation of the
Price Control in the Coffee Industry
Price Filing Under NRA Codes
Production Control in the Ice Industry
Production Control, Case Studies in
Resale Price Maintenance Legislation in the United States
Retail Price Cutting, Restriction of, with special Emphasis on The Drug Industry.
Trade Practice Rules of The Federal Trade Commission (1914-1936): A classification for
comparison with Trade Practice Provisions of NRA Codes.

Labor Studies

Cap and Cloth Hat Industry, Commission Report on Wage Differentials in
Earnings in Selected Manufacturing Industries, by States, 1933-35
Employment, Payrolls, Hours, and Wages in 115 Selected Code Industries 1933-35
Fur Manufacturing, Commission Report on Wages and Hours in
Hours and Wages in American Industry
Labor Program Under the National Industrial Recovery Act, The
Part A. Introduction
Part B. Control of Hours and Reemployment
Part C. Control of Wages
Part D. Control of Other Conditions of Employment
Part E. Section 7(a) of the Recovery Act
Materials in the Field of Industrial Relations
PRA Census of Employment, June, October, 1933
Puerto Rico Needlework, Homeworkers Survey

Administrative Studies

Administrative and Legal Aspects of Stays, Exemptions and Exceptions, Code Amendments, Con-
ditional Orders of Approval
Administrative Interpretations of NRA Codes
Administrative Law and Procedure under the NIRA
Agreements Under Sections 4(a) and 7(b) of the NIRA
Approve Codes in Industry Groups, Classification of
Basic Code, the -- (Administrative Order X-61)
Code Authorities and Their Part in the Administration of the NIRA
Part A. Introduction
Part B. Nature, Composition and Organization of Code Authorities
9768--2.

Part C. Activities of the Code Authorities
Part D. Code Authority Finances
Part E. Summary and Evaluation
Code Compliance Activities of the NRA
Code Making Program of the NRA in the Territories, The
Code Provisions and Related Subjects, Policy Statements Concerning
Content of NIRA Administrative Legislation
Part A. Executive and Administrative Orders
Part B. Labor Provisions in the Codes
Part C. Trade Practice Provisions in the Codes
Part D. Administrative Provisions in the Codes
Part E. Agreements under Sections 4(a) and 7(b)
Part F. A Type Case: The Cotton Textile Code
Labels Under NRA, A Study of
Model Code and Model Provisions for Codes, Development of
National Recovery Administration, The: A Review of its Organization and Activities
NRA Insignia
President's Reemployment Agreement, The
President's Reemployment Agreement, Substitutions in Connection with the
Prison Labor Problem under NRA and the Prison Compact, The
Problems of Administration in the Overlapping of Code Definitions of Industries and Trades,
Multiple Code Coverage, Classifying Individual Members of Industries and Trades
Relationship of NRA to Government Contracts and Contracts Involving the Use of Government
Funds
Relationship of NRA with States and Municipalities
Sheltered Workshops Under NRA
Uncodified Industries: A Study of Factors Limiting the Code Making Program

Legal Studies

Anti-Trust Laws and Unfair Competition
Collective Bargaining Agreements, the Right of Individual Employees to Enforce
Commerce Clause, Federal Regulation of the Employer-Employee Relationship Under the
Delegation of Power, Certain Phases of the Principle of, with Reference to Federal Industrial
Regulatory Legislation
Enforcement, Extra-Judicial Methods of
Federal Regulation through the Joint Employment of the Power of Taxation and the Spending
Power
Government Contract Provisions as a Means of Establishing Proper Economic Standards, Legal
Memorandum on Possibility of
Industrial Relations in Australia, Regulation of
Intrastate Activities Which so Affect Interstate Commerce as to Bring them Under the Com-
merce Clause, Cases on
Legislative Possibilities of the State Constitutions
Post Office and Post Road Power -- Can it be Used as a Means of Federal Industrial Regula-
tion?
State Recovery Legislation in Aid of Federal Recovery Legislation History and Analysis
Tariff Rates to Secure Proper Standards of Wages and Hours, the Possibility of Variation in
Trade Practices and the Anti-Trust Laws
Treaty Making Power of the United States
War Power, Can it be Used as a Means of Federal Regulation of Child Labor?
9768--4.

THE EVIDENCE STUDIES SERIES

The Evidence Studies were originally undertaken to gather material for pending court cases. After the Schechter decision the project was continued in order to assemble data for use in connection with the studies of the Division of Review. The data are particularly concerned with the nature, size and operations of the industry; and with the relation of the industry to interstate commerce. The industries covered by the Evidence Studies account for more than one-half of the total number of workers under codes. The list of those studies follows:

Automobile Manufacturing Industry	Leather Industry
Automotive Parts and Equipment Industry	Lumber and Timber Products Industry
Baking Industry	Mason Contractors Industry
Boot and Shoe Manufacturing Industry	Men's Clothing Industry
Bottled Soft Drink Industry	Motion Picture Industry
Builders' Supplies Industry	Motor Vehicle Retailing Trade
Canning Industry	Needlework Industry of Puerto Rico
Chemical Manufacturing Industry	Painting and Paperhanging Industry
Cigar Manufacturing Industry	Photo Engraving Industry
Coat and Suit Industry	Plumbing Contracting Industry
Construction Industry	Retail Lumber Industry
Cotton Garment Industry	Retail Trade Industry
Dress Manufacturing Industry	Retail Tire and Battery Trade Industry
Electrical Contracting Industry	Rubber Manufacturing Industry
Electrical Manufacturing Industry	Rubber Tire Manufacturing Industry
Fabricated Metal Products Mfg. and Metal Finishing and Metal Coating Industry	Shipbuilding Industry
Fishery Industry	Silk Textile Industry
Furniture Manufacturing Industry	Structural Clay Products Industry
General Contractors Industry	Throwing Industry
Graphic Arts Industry	Trucking Industry
Gray Iron Foundry Industry	Waste Materials Industry
Hosiery Industry	Wholesale and Retail Food Industry
Infant's and Children's Wear Industry	Wholesale Fresh Fruit and Vegetable Industry
Iron and Steel Industry	Wool Textile Industry

THE STATISTICAL MATERIALS SERIES

This series is supplementary to the Evidence Studies Series. The reports include data on establishments, firms, employment, Payrolls, wages, hours, production capacities, shipments, sales, consumption, stocks, prices, material costs, failures, exports and imports. They also include notes on the principal qualifications that should be observed in using the data the technical methods employed, and the applicability of the material to the study of the industries concerned. The following numbers appear in the series:

9768--5.

Asphalt Shingle and Roofing Industry	Fertilizer Industry
Business Furniture	Funeral Supply Industry
Candy Manufacturing Industry	Glass Container Industry
Carpet and Rug Industry	Ice Manufacturing Industry
Cement Industry	Knitted Outerwear Industry
Cleaning and Dyeing Trade	Paint, Varnish, and Lacquer, Mfg. Industry
Coffee Industry	Plumbing Fixtures Industry
Copper and Brass Mill Products Industry	Rayon and Synthetic Yarn Producing Industry
Cotton Textile Industry	Salt Producing Industry
Electrical Manufacturing Industry	

THE COVERAGE

The original, and approved, plan of the Division of Review contemplated resources sufficient (a) to prepare some 1200 histories of codes and NRA units or agencies, (b) to consolidate and index the NRA files containing some 40,000,000 pieces, (c) to engage in extensive field work, (d) to secure much aid from established statistical agencies of government, (e) to assemble a considerable number of experts in various fields, (f) to conduct approximately 25% more studies than are listed above, and (g) to prepare a comprehensive summary report.

Because of reductions made in personnel and in use of outside experts, limitation of access to field work and research agencies, and lack of jurisdiction over files, the projected plan was necessarily curtailed. The most serious curtailments were the omission of the comprehensive summary report; the dropping of certain studies and the reduction in the coverage of other studies; and the abandonment of the consolidation and indexing of the files. Fortunately, there is reason to hope that the files may yet be cared for under other auspices.

Notwithstanding these limitations, if the files are ultimately consolidated and indexed the exploration of the NRA materials will have been sufficient to make them accessible and highly useful. They constitute the largest and richest single body of information concerning the problems and operations of industry ever assembled in any nation.

L. C. Marshall,
Director, Division of Review.
